SHOW

Best Quotes

of this week's Episode

“

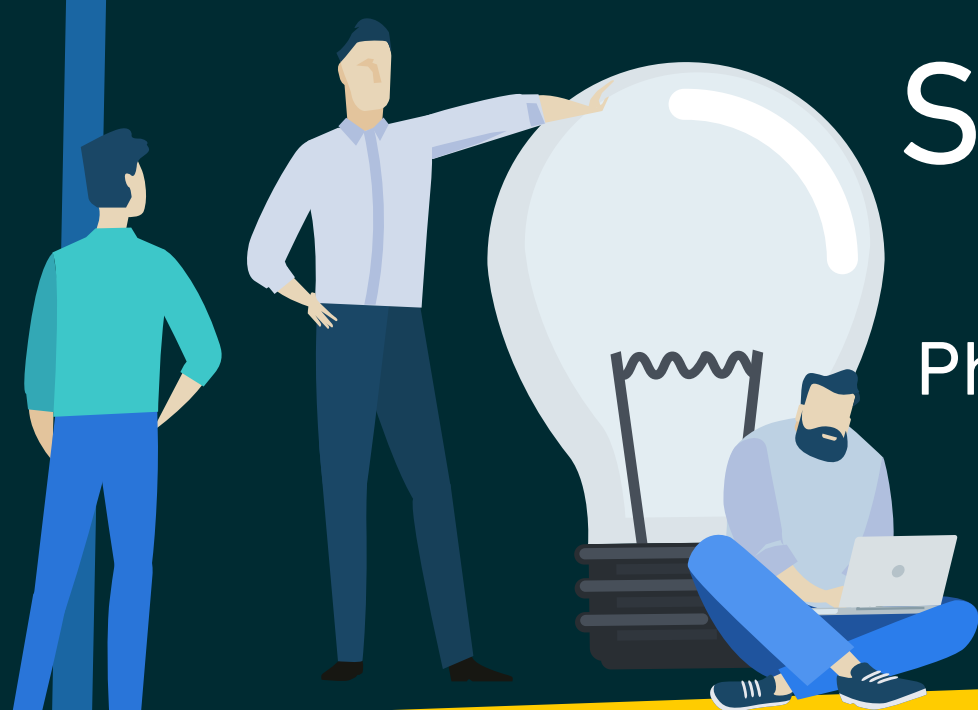

I wanted to study
physics, because
**I wanted to study
nature.**

(DON'T!)
**WASTE
WATER**

Silvana Di Sabatino

Professor of Atmospheric
Physics @ University of Bologna

Full story on dww.show

Our idea is to construct
the proof of the efficacy
of nature-based
solutions to mitigate
hydro-meteorological
risks.

Silvana Di Sabatino

Professor of Atmospheric
Physics @ University of Bologna

(DON'T!)
**WASTE
WATER**

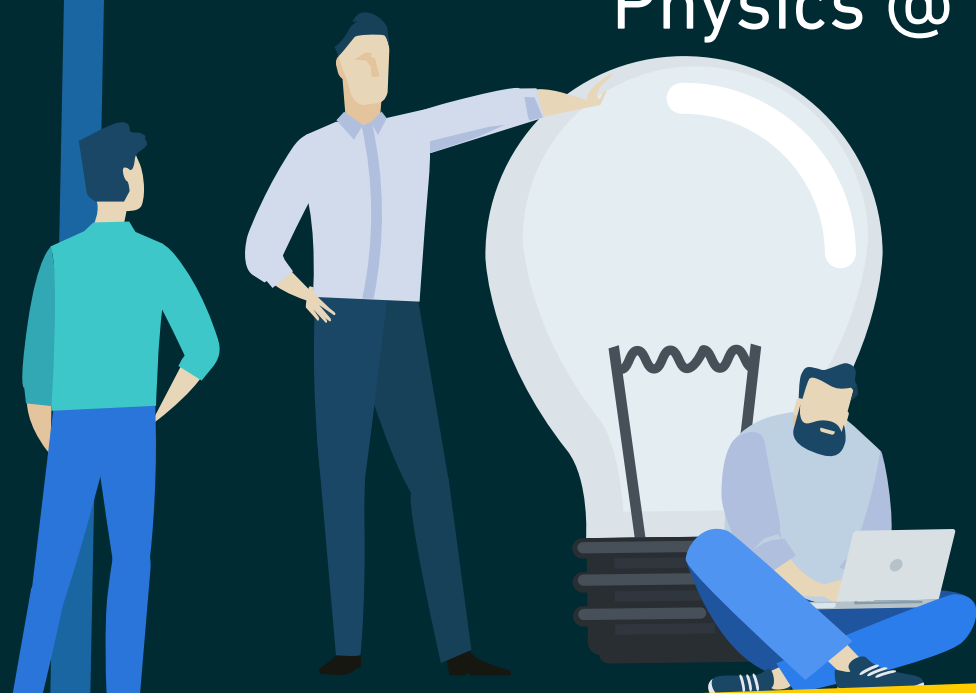

Full story on dww.show

We would like to
promote a **change of
paradigm on how we
do engineering using
nature!**

Silvana Di Sabatino

Professor of Atmospheric
Physics @ University of Bologna

(DON'T!)

**WASTE
WATER**

Full story on dww.show

We have to **transform what nature teaches us into an engineering approach**, but cautious of the interactions with the citizens and the stakeholders.

(DON'T!)
**WASTE
WATER**

Silvana Di Sabatino

Professor of Atmospheric
Physics @ University of Bologna

Full story on dww.show

We're not talking of co-benefits - which are very important - but of the central part: **proving scientifically that the methods we propose work.**

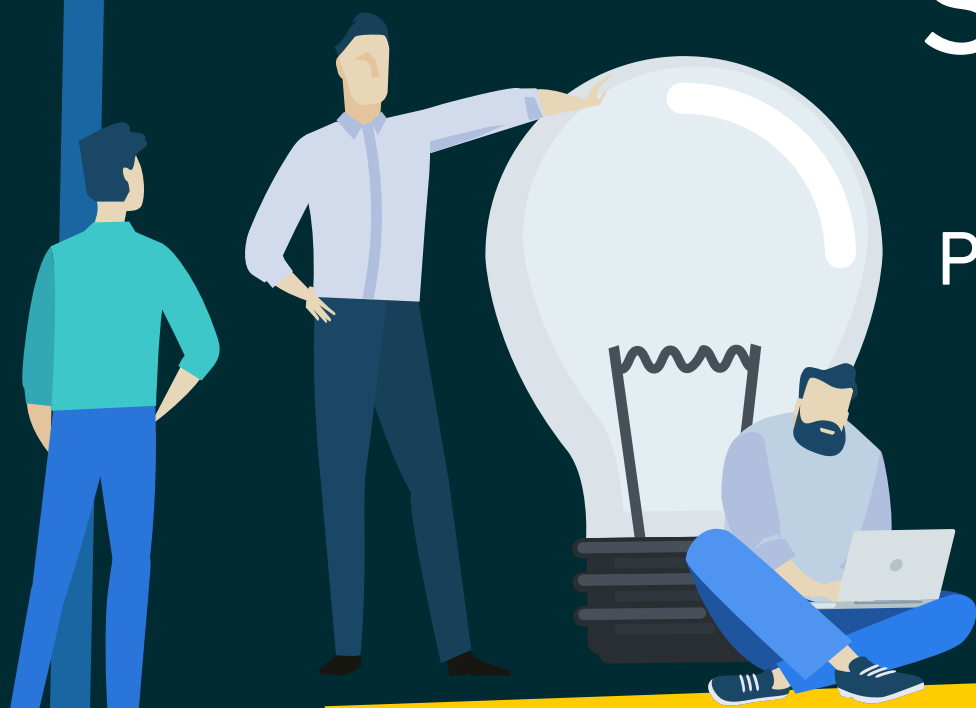

Silvana Di Sabatino

Professor of Atmospheric
Physics @ University of Bologna

(DON'T!)
**WASTE
WATER**

Full story on dww.show

**Open Air Laboratories
are an evolution of
the living labs, really
customized for hydro-
meteorological risks.**

(DON'T!)
**WASTE
WATER**

Silvana Di Sabatino

Professor of Atmospheric
Physics @ University of Bologna

Full story on dww.show

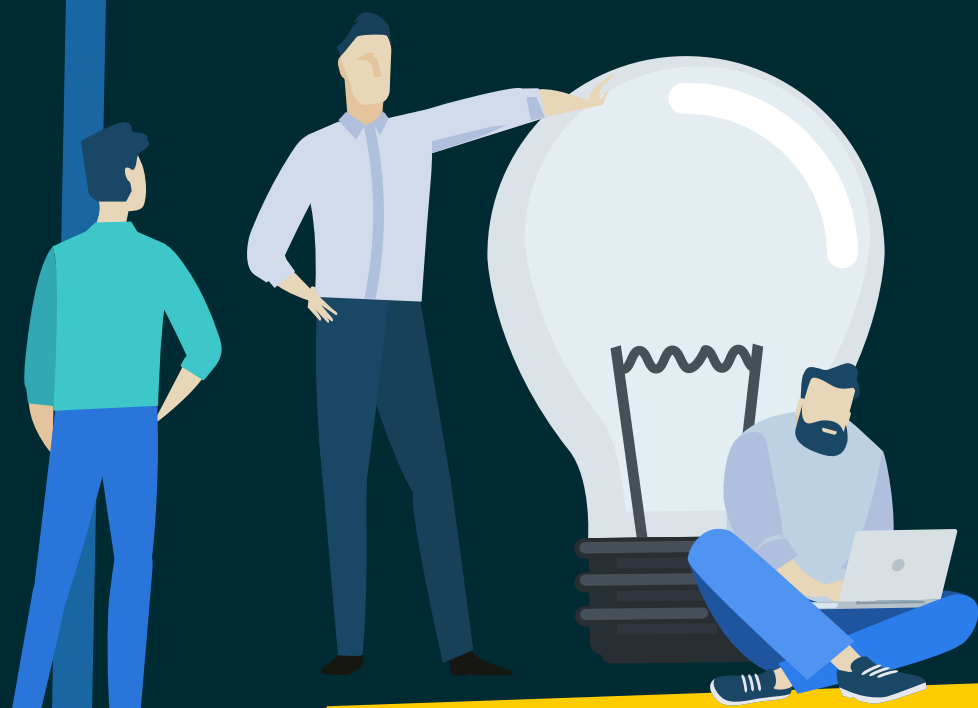

We have engineers,
we have physicists,
but **we have also**
sociologists and
architects!

(DON'T!)
**WASTE
WATER**

Silvana Di Sabatino

Professor of Atmospheric
Physics @ University of Bologna

Full story on dww.show
