

Season 4 - Episode 7

DWW  
SHOW

Best Quotes

of this week's Episode

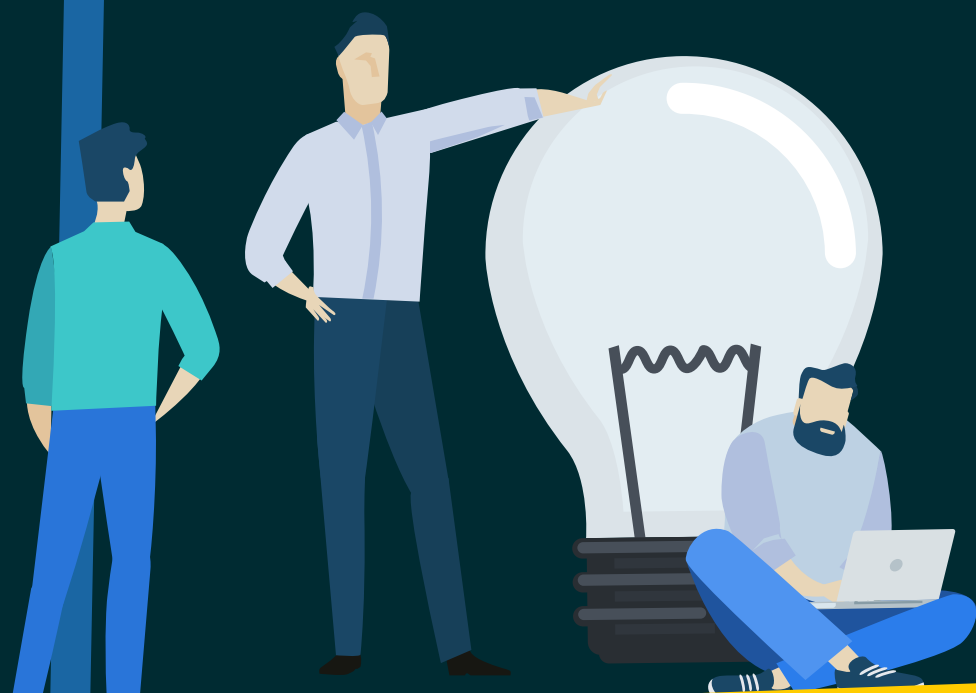

The Industry is  
at its best when  
**everyone is sharing  
what they do!**

Luke Butler

Director of Innovation  
at Qatium

(DON'T!)

**WASTE  
WATER**

**Full story on [dww.show](http://dww.show)**

“

Hydraulic modeling is the simulation of water networks. It is primarily used to answer “What if” questions.

(DON'T!)  
**WASTE  
WATER**

**Luke Butler**

Director of Innovation  
at Qatium

**Full story on [dww.show](http://dww.show)**

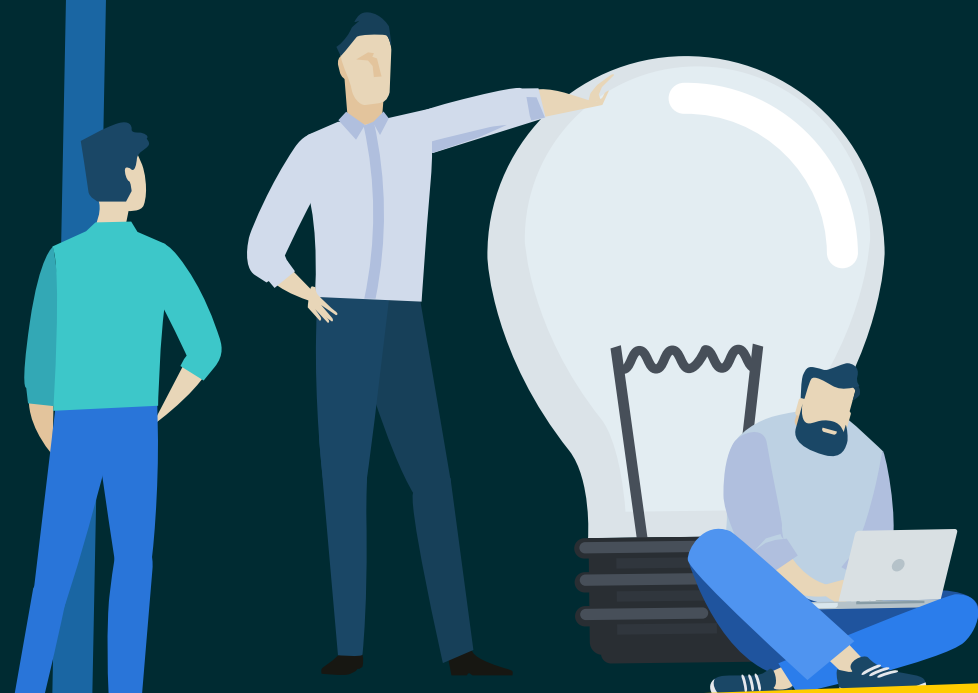

You have hundreds,  
maybe thousands of  
kilemeters of water  
mains. For a lot of it,  
**we have no idea of  
what's actually  
happening there!**

(DON'T!)  
**WASTE  
WATER**

**Luke Butler**

Director of Innovation  
at Qatium

**Full story on [dww.show](http://dww.show)**

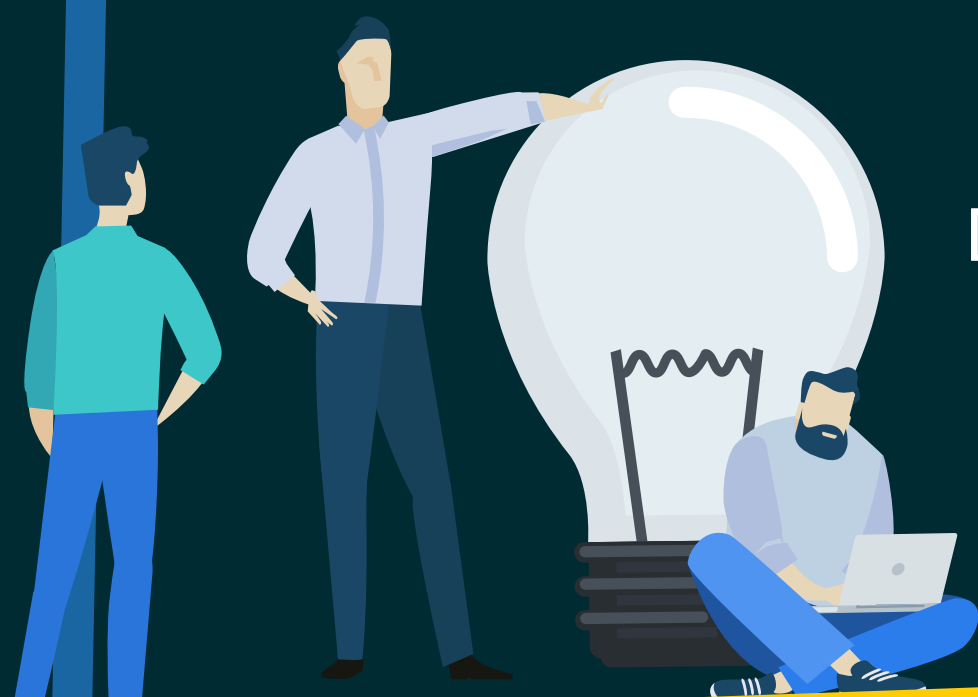

“

Hydraulic modeling  
lets you bridge that  
**gap** to simulate and  
understand beyond  
what we can see.

Luke Butler

Director of Innovation  
at Qatium

(DON'T!)  
**WASTE  
WATER**

**Full story on [dww.show](https://dww.show)**

Every utility I've ever met has some type of hydraulic model. **The question is more how they use it day to day.**

(DON'T!)

**WASTE  
WATER**

**Luke Butler**

Director of Innovation  
at Qatium

**Full story on [dww.show](http://dww.show)**

“

They have to figure out: “are the pipes that I’ve got in the ground going to be suitable in the next 30 years?”

**Sometimes it represents hundreds of millions or dollars worth of plans!**

**Luke Butler**

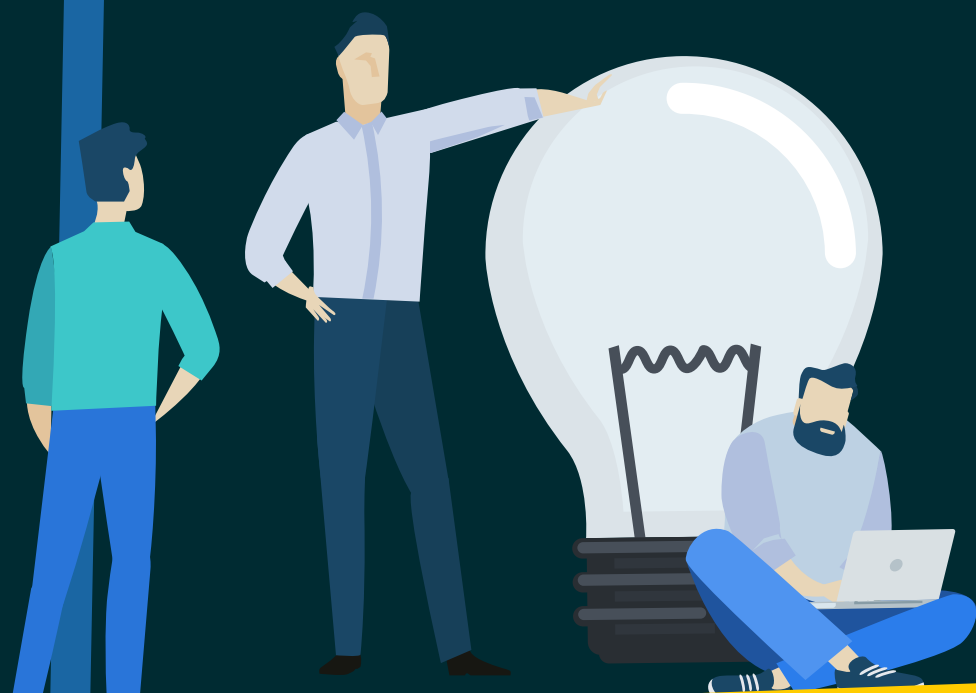

Director of Innovation  
at Qatium

(DON'T!)

**WASTE  
WATER**

**Full story on [dww.show](http://dww.show)**

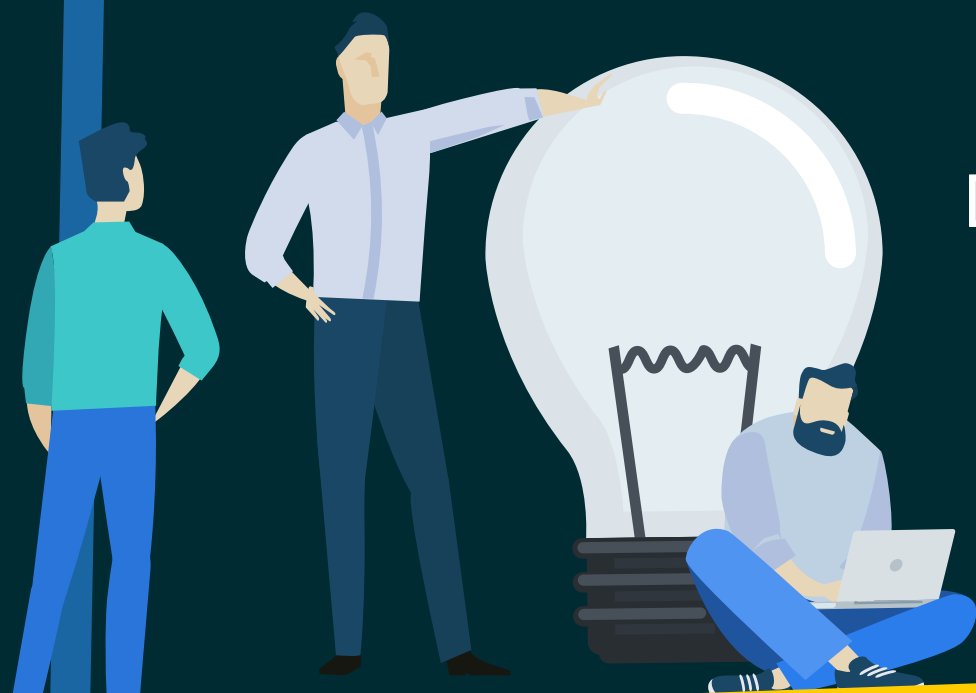

I see hydraulic models  
**having so much more  
potential** than just being  
something that's pulled  
out every five years to  
write a big plan!

Luke Butler

Director of Innovation  
at Qatium

(DON'T!)

**WASTE  
WATER**

**Full story on [dww.show](http://dww.show)**

**You get overloaded  
with information  
unless you know  
where to look and to  
understand some of  
the issues.**

**Luke Butler**

Director of Innovation  
at Qatium
