SHOW

Best Quotes

of this week's Episode

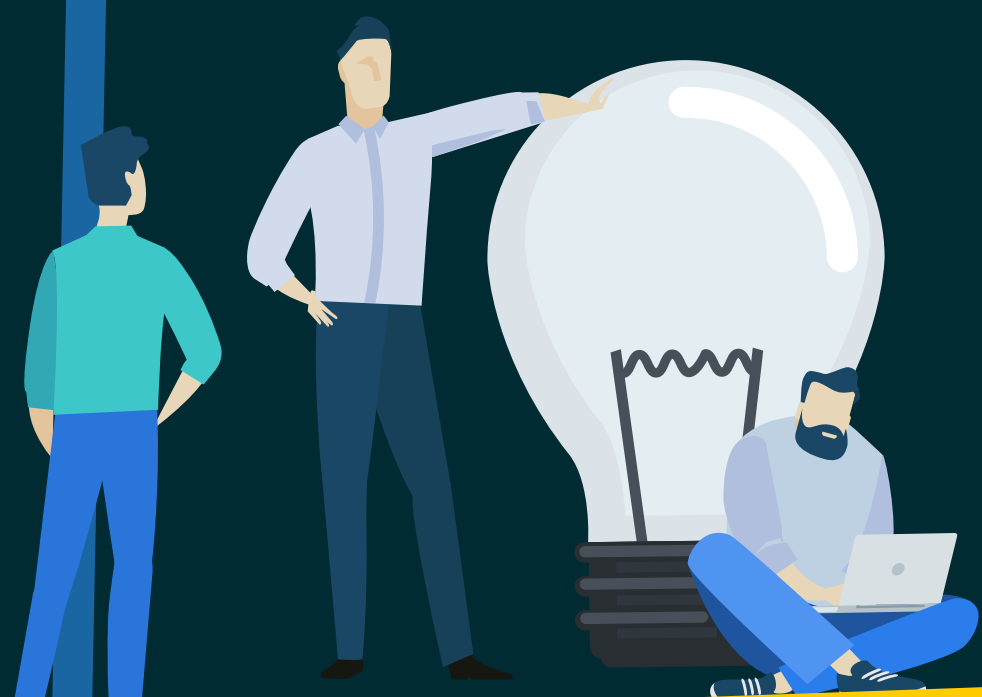

Hydrogen is not really
a decarbonization
strategy. It's more
of a **decarbonization
problem!**

(DON'T!)
**WASTE
WATER**

Paul Martin

I agree with Goethe:
in all things, **hope is
preferable to despair.**
Except when hope
requires the law of
physics to be set aside!

(DON'T!)
**WASTE
WATER**

Full story on dww.show

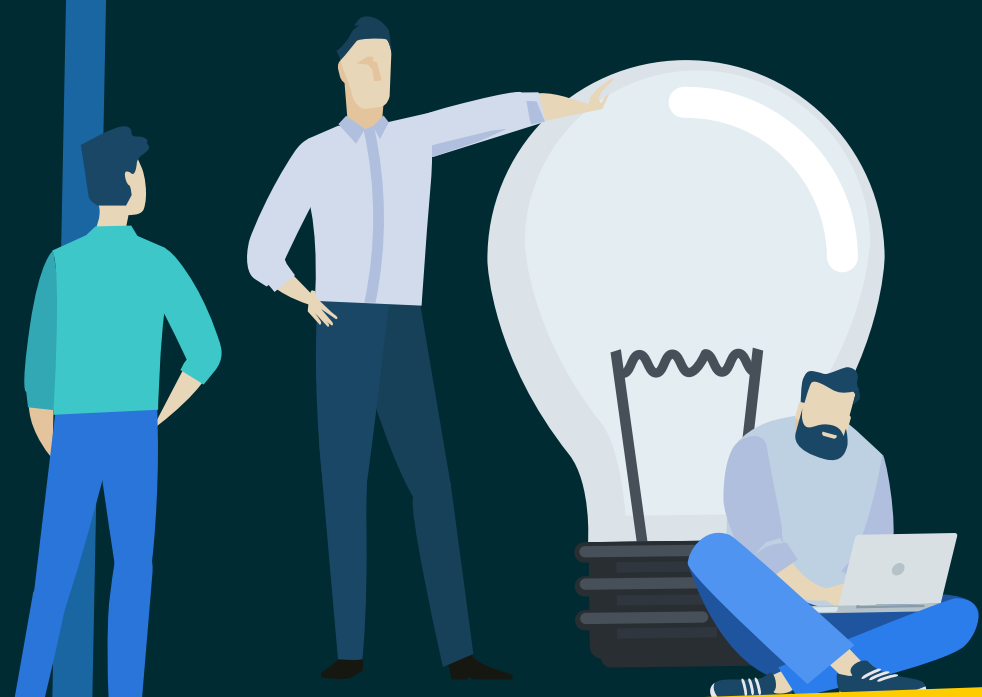

The issue with
Hydrogen **is not**
Water use, it's
Energy use!

(DON'T!)
**WASTE
WATER**

Paul Martin

Founder @
Spitfire Research

Full story on dww.show

Only **about 8%** of the **Hydrogen** that we make in the world is moving any distance **at all**. When the industry does something to that extreme extent, that's generally for good reasons.

Paul Martin

Founder @
Spitfire Research

(DON'T!)
**WASTE
WATER**

Full story on dww.show

To make 90 million tons of Hydrogen using the best electrolyzer in the world, you need 4'500 terawatt hours of electricity. That's **more than twice the world's installed wind and solar capacity in 2019!**

(DON'T!)
**WASTE
WATER**

Paul Martin

Founder @
Spitfire Research

Hydrogen is being pushed by **useful idiots**, that think they're gonna make giant amounts of renewable electricity that nobody will know what to do with!

Paul Martin

Founder @
Spitfire Research

(DON'T!)
**WASTE
WATER**

Full story on dww.show

You have to sell something, right?
Otherwise you have to go out of business, and going out of business is hard for people to accept.

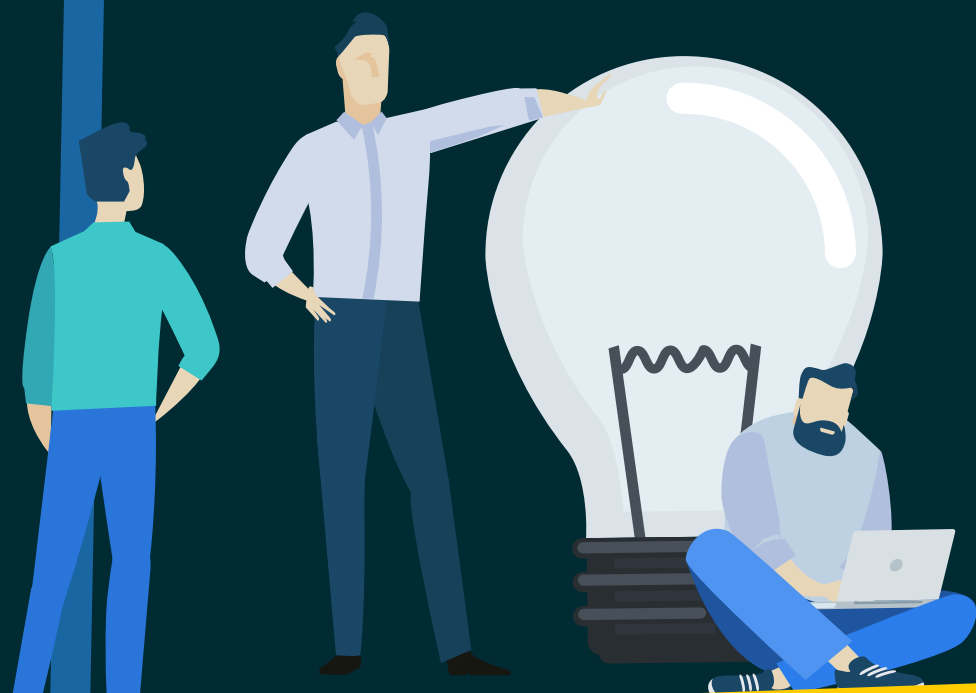

(DON'T!)
WASTE WATER

Paul Martin

Founder @
Spitfire Research

Full story on dww.show

There's really **only black hydrogen in the World** right now. And then, there's the potential to make these other colors!

(DON'T!)
**WASTE
WATER**

Paul Martin
