

Stephane Bessadi

is Senior Procurement Specialist for the Asian Development Bank

ADB

ASIAN DEVELOPMENT BANK

Every project backed by the Asian Development Bank first undergoes their Screening Tool for Energy Evaluation of Projects (STEEP)

(DON'T!)
**WASTE
WATER**

We're trying to have a strategic, long-term approach. We don't only consider project development and implementation, but really what would be the future operation of the plant for the coming 10-15 years!

This operational excellence follows a clear north star: energy efficiency. Wanna check it out for yourself? The tool is freely available online, and can be downloaded for free!

Check out Stephane's full interview to learn more, like:

- How to build more efficient, inclusive, and climate friendly water and wastewater projects
- How water challenges often come hand in hand with energy struggles - and how to kill two birds with one stone
- How STEEP was built from pilot studies and field data, enriched with operational feedback
- How digital solutions and new technologies support the transition towards higher energy efficiency
- How the population's welfare is highly interlinked with water quality - especially in developing countries
- Getting value for money, assessing technologies, supporting innovation, partnering with private sector companies, acting with pedagogy... and much more!

Don't miss a single bite: head over to dww.show or meet us on stage for the Global Water Summit in Madrid!
